

 **The life of Jesus Christ:** The most established historical figure in existence, referred to daily by virtually all global authorities, described in several early non-Christian historical records, his crucifixion is universally accepted as a fact by secular scholars.

 **Fulfilled prophecies:** Hundreds of predictions became reality hundreds of years after they were written. For example: Jesus fulfilled 351 specific prophecies such as in Psalm 22 and Isaiah 53, and the return of the nation of Israel in Ezekiel 36:22-28.

 **Scientific verification:** The modern scientific method was developed on expressly biblical principles and presuppositions, the first scientists being of Christian faith. Biblical doctrines are confirmed by science such as: the universe having a beginning, the function of DNA, Pi n expressed as a product of a natural ratio, rib bones being the only human bone that regrow, math patterns in nature showing the world isn't random and irreducible bio complexity debunking incremental evolution.

Bible evidence:

 **Unique & unified message:** The bible is 66 books written across ~1500 years by ~40 authors, yet it maintains a consistent unified message with 60,000+ cross references and zero valid errors or contradictions.

 **Proven preservation:** The bible is the most supported ancient text, backed by over 5,000 Greek and 5,000 Hebrew manuscripts. Its preservation is confirmed by archaeology and its widespread distribution made any changes easily detectable.

 **Archaeological verification:** The bible is constantly being supported by new archaeological findings, such as the ash ruins of Sodom, the blackened peak of Mount Sinai, marine fossils on global mountaintops, oceanic fault lines, polystrate fossils, ship remains in Turkey matching Noah's ark, the Hittite civilization, the Tel Dan Stele inscription, the walls of Jericho and the city of Nineveh.
